Seminar on Entrepreneurship

Posted on October 31, 2013 by Richa Sharma

Under the program LEAD (Leadership in Education for Action and Development) sponsored by Hewlett Packard (H.P) and Indian Council for Integral Education (ICIE), a seminar was organized on developing entrepreneurship skills among the young aspirants at Jwaharlal Nehru Government Engineering College, Sundernagar Dist. Mandi (H.P). It is an initiative to let students think innovative yet practical. Sharing an idea which can be implemented and be looked upon by millions. The students were keen to know the various strategies of starting up one's own venture. It was an open forum for all the students to share their views on taking up entrepreneurship as a choice. Lot many aspiring female entrepreneurs too were seen quite inquisitive on starting up their own ventures, like one of the students Vishakha wants to start up a high quality paper industry and wants to generate a source of employment to various people. Mr Jitender Verma, gave a powerpoint presentation on entrepreneurship where he related how human mind has shown that creativity has no barrier by giving live examples of Dhirubhai Ambani, Azim Premji, Bill Gates etc. The presentation was followed by filling up entrepreneurship questionnaire, which was a kind of psychological test regarding their inner instinct like what problems they face when they think of starting something new, what are the hurdles in their lives, do they actually want to implement their ideas etc. Students were happy about the fact that E-cell will be soon active in their college. Such sessions indeed need to be conducted at a regular interval is what is being opinionated by most of the students. Kamaldeep, Pankaj and Sankalp, students of JNVEC, opined that interactions and sessions with entrepreneurs will boost up their ideas of starting up something new. It would give them a push to take risk and think out of the box. Himanshu Saxena student of third year feels that students get confused about what to do after the completion of their course and such seminars and sessions would help them in channelizing their thoughts and ideas.
