Centre for Sustainable Development organized one day Leadership Framework Workshop for students of B. tech at Shiva Institute of Engineering and Technology, Bilaspur under the program LEAD proudly sponsored by HP and ICIE. The workshop was based on the approach to develop leadership among new generation professionals. The workshop covered issues around personal, professional and community lives which remain unaddressed due to lack of leadership in their personal lives. The discussions were held with students who participated in the workshop whole heartedly. The focus of the discussion was, 'How an individual turns into a LEADER'? 'What makes him stand apart and LEAD'? Jitender Verma, President(CSD) talked about the various qualities like motivation, resilience, patience, will power, time management etc. which need to be possessed by a LEADER. During workshop a common framework of Leadership was developed and students identified various theme areas according to their interests like social empowerment, climate change, gender equality, culture and tradition, adventure etc. The workshop was conducted by Jitender Verma, Richa Sharma, Sushant Sharma and Richa Sharma of Centre for Sustainable Development. The workshop was well coordinated by Er.Vikrant Chandel and Er. Sunil of SIET.
In the next stage the students will be organized in various students groups to work in areas identified during the workshop. The students will take 'LEAD' to resolve issues in such areas. The students engagement will not only resolve many social issues but the students will pick up highly prized functional skills like interpersonal skills, project management, crisis management, decision making, confidence, innovation, creativity etc.
